Poster Mounting

Authors are responsible for mounting their own materials within a set time and removing them at the end of the last day (i.e. by noon April 6). Posters left up past that time will be discarded.

Poster Layout

Contents should be clearly structured under the headings of Purpose, Methods, Results, and Conclusions. Heading fonts should be larger than the body text. Make sure the poster is not crowded with text.

Poster Design

Posters can be designed using computer programs such as PowerPoint, CorelDRAW or Adobe InDesign. White text on a dark background may be used, but only sparingly. In general, white, muted, or pastel backgrounds with black text are the best options. Use an appropriate balance of text and images to convey your message in a reader-friendly way.

Text & Font Size

The text should be concise to ensure good visibility at approximately 3 feet. Please include all the most important ideas, but not necessarily all the fine details. Use a font size of at least 20 points and single spacing for body text. Do not use ALL UPPER-CASE TEXT because it is difficult to read.

Tables

Tables should be simple and easy to follow.

Illustrations

The legend of a figure should appear below the figure. Illustrations are more appealing if they are in color.

References

Please include eight pertinent references at most.

Permission for Images

Please ensure you have permission to use any images in the poster. This includes licenses for copyrighted materials and consent forms from patients recognizable in photographs or images.

Interests

Financial interests, if any, must be disclosed and included in the poster. Presentations must not be used to promote a commercial product.
